About Ikon Institute of Australia

Established in 1988, the IKON Institute has been helping people help others for over 25 years. Today we are the largest provider of Art Therapy training in Australia and a leading provider of humanistic and therapeutic training. Our courses are nationally recognised and accredited.

Student success starts with
Learning Relationship Management

How do you use Wisenet, and how has Learncycle Workflows worked for you?

IKON uses the online enrolment function and it has streamlined our processes using Learncycle Workflows to automate processes including sending messages (emails), creating tasks for staff to follow up applicants, and creating uReports to send to applicants/students.

We love what Wisenet has to offer and we are looking more into Learncycle Workflows to automate all processes in the student journey.

How has Wisenet improved your day-to-day operations?

We have become much more efficient with less manual entering, for example, a student card template can be created and then be exported from Wisenet to then print. Credentials are also created from Wisenet, which are customised to us and we can change the template if needed at no additional cost.

Bulk messages to students and in specific cohorts has been a massive help. The task function in Wisenet has helped with following up on specific things, as long as you've set it up correctly then it'll pop up in your dashboard when it's due.

Build and nurture your most valuable relationships with next generation education management applications for Private Education Providers
