

Orange International College Loves Wisenet

"Your student's experience is more important than ever before and from enrolment to completion you can streamline their journey in Wisenet."

Nisha Pancholi
Administration Manager

About Orange International College

Orange International College was established in 2013 to provide ELICOS to international students, and VET programs to domestic as well as international students. It delivers VET courses at various Australian Qualification Framework levels in addition to English Language Intensive Course for Overseas Students.

Student success starts with
Learning Relationship Management

Wisenet facilitates the success of RTOs with automated workflows.

Wisenet is used as a management system for all students, agents, and staff. Learncycle Workflows has worked as an assistance to automate our notification and reminders to students to minimise the time spent working on manual tasks.

Access what you want, when you want it.

Wisenet has improved our operations by making reporting and student management simplified in one system allowing us the capability to find essential documents and data easily. It supports our staff in periodically auditing our practices and procedures, also making it possible for our staff to work remotely and access organisational information from any device.

Using Wisenet has taught us a lot about running of an RTO smoothly.

Our Wisenet experience has greatly assisted us to manage time and keep up with multiple priorities by having one system to maintain all information and tasks. Workers who have dealt with deadline pressure and lengthy to-do lists are more likely to have developed personal strategies via the dashboard that make them more efficient. In addition, someone who has been expected to negotiate lots of active projects should have a system of organization that works for them. We have learned to filter incoming information, determine what is important or actionable, and manage correspondence in a timely manner via the reporting functions.

We leave the heavy-lifting to Wisenet, so should you.

Running an RTO is complex and Wisenet simplifies this by providing you with technology and premium service so you can streamline your process and create exceptional student experiences. Your student's experience is more important than ever before and from enrolment to completion you can streamline their journey in Wisenet.
