About PORSE

PORSE Education and Training Limited work with thousands of people throughout New Zealand to provide in-home childcare services, community play and learning programmes, on-the-job training and STAR/Gateway unit standards for secondary school students.

wisenet™

**Student success starts with
Learning Relationship Management**

We use Wisenet and Learncycle Workflows for all our administrative needs.

Wisenet is an easy to use learner management system that helps to keep track of learners progress through different stages. The checklist, uReport, and scheduled trigger (Learncycle Workflow) features are very useful. It made communications and tracking easier.

Many record fields in the enrolment stage might be marked as a compulsory field so that the user does not miss entries, this helps to generate error free SDR and NZQA reports.

Our day-to-day operations run smoothly, thanks to Wisenet.

Learncycle Workflows has made it a lot more manageable and easy. The scheduled trigger option is very helpful.

Our RTO perform better with Wisenet, so can yours.

System output is dependent on the time and effort users invest to learn about it. User knowledge, logic, and understanding is the key for better system performance.

Build and nurture your most valuable relationships with next generation education management applications for Private Education Providers
