

Zinfra ♥ Wisenet

"I am a big supporter of Wisenet and highly recommend it to other RTOs. This is due to the flexible user-friendly system and great, friendly support team."

Betty Hui

Manager

About Zinfra

Zinfra employs around 1,500 people, including 70 Australian Apprentices. The company's training programs are firmly embedded in its values and "Grow Our Own" workforce development strategy. As a registered training organisation (RTO), Zinfra also provides training to other workers in the industry.

Student success starts with
Learning Relationship Management

Wisenet keeps track of all our stakeholder interaction

We used Wisenet differently from other clients as we used it to record and report employee training-compliance training, qualifications and enterprise training.

Secure and integrated applications that save time

The Single Sign-On function for our employees to access their account securely without login details saves us a lot of admin time. The new eLearning Connector with AutoGrade makes the grading set up for online learning courses much easier.

Wisenet has improved our day-to-day operations

We record, monitor and run reports from Wisenet which are critical to our operations to ensure we have compliant staff working out at field. Reporting functions also assist the training planning activities.

"Wisenet is a very flexible system which not only is used for our RTO operations, we use the eLearning Connector to integrate with Moodle as our company LMS."

Build and nurture your most valuable relationships with next generation education management applications for Registered Training Organisations
