About ICASTEC

Based in Singapore, ICAS Training & Education College (ICASTEC) is a vocational school, delivering courses for the hotel, catering, cooking and pastry industries, focusing more on entrepreneurship, leadership and management, and has been recognized as one of the world's top quality educational institutions.

Student success starts with
Learning Relationship Management

Our next-generation applications manage business operations

At ICASTEC we use Wisenet for our daily operations, this includes messaging automation, development of monthly reports, storage of student records, and scheduling of important tasks.

Focus on what's important and leave the rest to us

Wisenet helps us to perform our daily operational tasks with ease. Thanks to the user-friendly interface and automation of important tasks anyone can manage the application with ease and we are able to focus on properly engaging with our learners. We are able to generate reports as well which is a massive timesaving.

Deploy Wisenet to save you time and money

Wisenet is the hub of our college where tasks are performed smoothly with automation. We get to save a lot of time (and money) on administrative items that would ordinarily be very time consuming.

Top quality service from system infrastructure to customer support

Use Wisenet, I highly recommend the system to others to run their daily operations. The system has worked so well for us and the support that we receive from the Customer Engagement team is always greatly appreciated.

Build and nurture your most valuable relationships with next generation education management applications for Private Education Institution
